VW Displacement Gauge VWDT-5000

Geosense[®] VWDT-5000 series of vibrating wire displacement gauges cover displacement ranges up to 300mm and are fully waterproof to a minimum of IP68 (16 bar external pressure)

VW Displacement Gauge VWDT-5000

Overview

Geosense® VWDT-5000 series of vibrating wire displacement transducers cover displacement ranges up to 300mm and are fully waterproof to a minimum of IP68 (16 bar external pressure). They can be incorporated into many displacement products such as crack and joint meters, convergence meters, soil extensometers and displacement meters.

VWDT-5000 transducers are particularly rugged, and are carefully constructed and thermally aged to minimise long term drift and changes in calibration. The gauges will withstand demanding environmental factors encountered in Civil Engineering construction sites such as tunnels and piling applications.

The data from the VWDT-5000 can be monitored by means of a portable read-out unit or connected to a data logger and distributed if required by telemetry.

Vibrating wire instruments output a frequency signal, and are therefore insensitive to resistance changes in connecting cables caused by contact resistance or leakage to ground. Cable may be readily and simply extended on site without special precautions. Gauges may be read up to 1000 metres away from their installed location, without change in calibration.

Instruments may be read by any commercially available Vibrating wire readout system operating on either the pluck pulse or swept frequency excitation principle, provided that these units operate over the frequency range of the instruments. In addition, these instruments can be data-logged by a variety of data-loggers equipped with vibrating wire excitation modules including Campbell Scientific and Datataker units.

Units are supplied with a M6 female threaded connection on the measuring plunger.

APPLICATIONS

Rod Extensometers

Crack-meters

Joint-meters

Wire Convergence meters

FEATURES

Reliable long-term performance

Rugged, suitable for demanding environments

High accuracy

Insensitive to long cable lengths

Waterproof to 16 bar

VWDT-5010	500	1451	1901	13	
PERFORMANCE					
Resolution		<0.025% FS			
Accuracy		±0.1% FS			
Nonlinearity		<0.5% FS			
ELECTRICAL					
Frequency range		1650-2700 Hz			
Nominal zero value		1850 Hz	1850 Hz		
MECHANICAL					
Operating temperature range		-20 °C to +80°C			
Body material		Stainless steel			
Inner rod		Stainless steel			
O-ring		Viton			
Waterproof rating		IP68 (16 bar)			
Cable		2 pair PUR sheath			
Cable Type		Type 900 - VW Sensor v	Type 900 - VW Sensor with Foil Screen & Drain Wire
